

THE LITTLE STAR THAT SHONE BRIGHT

High in the night sky, there was a little star named Lumi. She was smaller and dimmer than the other stars.

One night, dark clouds covered the sky. The other stars could not be seen through the thick clouds.

Gathering her courage, Lumi shone through a gap in the clouds. Her light showed the child the way.

Down on earth, a little child was lost in the forest and could not find his way home.

MORAL:

No matter how small you are, your light can make a difference
